

**DITOGA tackles the challenge to keep VET trainings up-to-date with recent job market needs by engaging VET graduates in an ongoing feedback loop that provides meaningful data for VET providers.**

The **VET Graduate Tracking Strategy** offers guidelines and background information for VET providers to enhance the quality and sustainability of their training offers. A stand-alone booklet of key data fields is available online including tips for international validation and transferability of obtained results.

The **DITOGA mobile app** is targeted at VET graduates and features smart auto-analytics functions and gamification elements that allow continuous feedback for VET providers. For users, it serves as a motivational tool to excel themselves in their professional career. The data collection is complying to GDPR.

The **DITOGA analytics software** helps VET providers to analyse and interpret the data collected in order to find skill gaps and areas for improvement of their training offers. This assures high quality and sustainability potential for VET offers and complements various graduate tracking strategies on EU level.
